Customer Journeys

Three different customer journeys are described below. Each journey represents a customer segment: Lena Müller as a DIY-Enthusiast, Ben Schneider as a content creator and Jana Becker as a material and tool supplier (Partner). CraftCricle responds to the different needs and helps them to carry out their jobs.

LENA MÜLLER - INTERIOR DESIGNER

"I just want a sideboard that fits me – not something mass-produced."

Gender : Female
Age : 29
Location : Munich
DIY Experience : Beginner

Creative **Goal-Oriented**
Friendly **Detail-loving**

BIO

Lena is a 29-year-old interior designer from Munich who loves personalized spaces but lacks hands-on experience. Inspired by social media, she wants to build her own furniture but needs guidance, support, and affordable access to tools.

GOALS

- Build stylish furniture that fits her space and taste
- Avoid generic mass-market products
- Learn practical skills on a beginner level
- Save money by renting tools instead of buying

FRUSTRATION

- Most tutorials assume prior skills
- Doesn't own the tools needed
- Confusing steps and unclear materials
- No real support when stuck

MOTIVATION

- Personal growth through hands-on creation
- Social affirmation / inspiration
- Budget-friendliness through reuse and smart renting
- Sense of achievement

PERSONALITY

Introvert Extrovert
Analytical Creative
Loyal Fickle
Passive Active

PREFERRED CHANNELS & DEVICES

- Channels: Instagram, Pinterest, YouTube Shorts
- Devices: iPhone, MacBook

DIY-Enthusiast

Lena Müller, a 29-year-old interior designer from Munich, is scrolling through Instagram when she comes across a promoted post by CraftCircle. The ad features a beautifully styled, rustic DIY coffee table with the tagline: "Build stylish furniture yourself - even with no prior experience." Intrigued by the aesthetic and the beginner-friendly message, Lena clicks the link.

CraftCircle Tutorials Challenges Community

Q Search - Log in Register

Create Unique pieces with your hands

Discover step-by-step guides for impressive furniture pieces that give your home a personal touch – no prior knowledge needed.

BUILD IT YOURSELF. MAKE IT LAST.

Lena signs up by entering her credentials and accepting the terms and conditions. She begins a quick but engaging personalization flow. She selects her main interest, the furniture building.

Welcome to CraftCircle!

Let's personalize your experience

How much experience do you have?

We'll adapt project suggestions and tutorials to your level

Beginner

I'm new to DIY and have little or no experience with tools.

Intermediate

I've completed a few projects and am familiar with basic tools.

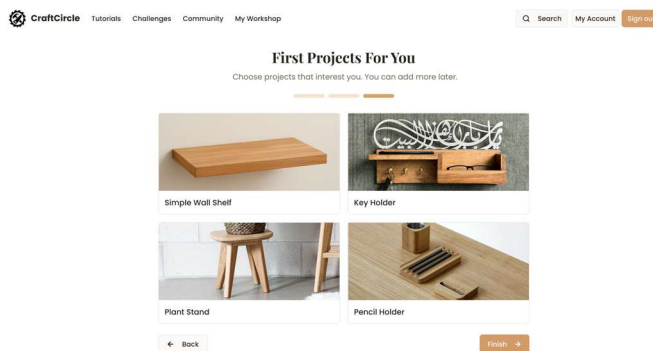

Advanced

I'm an experienced DIY enthusiast and can tackle complex projects.

← Back

Next →

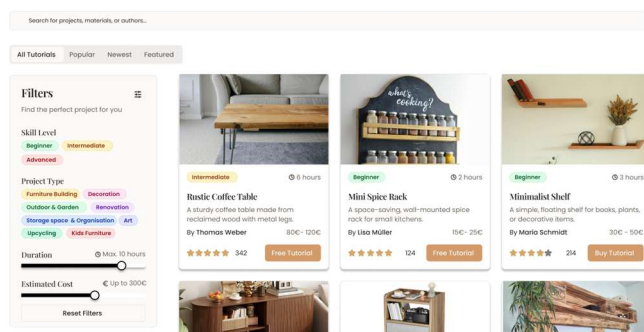

After selecting her interest, Lena confirms she's a beginner. The registration uses understandable and fitting categories that make her feel welcome rather than judged in this new space.

After confirming she's a beginner, Lena gets four suggested DIY furniture tutorials. Instead of choosing something directly, she wants to look at all tutorials available. She clicks on "Tutorials" in the header.

DIY Furniture Tutorials

Discover step-by-step guides for your next DIY furniture projects, from simple beginner projects to sophisticated design pieces.

The tutorial interface offers a smart set of filters on the left side, allowing her to easily sort projects by skill level, project type, estimated duration, and material cost. Eager to find a project that fits both her skill level and her limited budget, Lena quickly sets the filters to "Beginner", "Furniture Building", a short duration, and a low material cost. Lena scrolls through

the tailored list and spots several inviting options.

With her filters set, Lena selects a project that appeals to her: the "Rustic Coffee Table".

Rustic Coffee Table

Ben Schneider
Master Carpenter

Published on 15.03.2025

A DIY project that combines tradition with modern design. This coffee table combines the warmth of reclaimed wood with the clean lines of industrial design. The perfect piece of furniture for your living room - with history and personality.

View all tutorials

On the project page, she sees the build duration, ratings, a clear project photo, and a recommended material and tool list with estimated costs. Through a partnership with OBI she gets the option to rent necessary tools via a redirection link to OBI's tool rental program.

Everything looks transparent and easy to follow, so she decides to start building.

Lena opens the step-by-step guide and starts with the first instruction: preparing the wood.

Step-by-Step Guide

Video Tutorial

1

Prepare the wood

Clean the reclaimed wood boards thoroughly and sand them with 80 grit to remove old paint residue and splinters.

Tip:

Pay attention to the direction of the wood grain when sanding.

She follows clear photos and short instructions (e.g. cleaning and sanding the boards as described). A helpful tip reminds her to sand with the grain, making it easy to get started with confidence. Also, if provided by the creator, she can watch a video explaining each step in more detail.

Lena M. 2 weeks ago

Thank you for the great tutorial! I just finished my coffee table and I'm so happy with how it turned out. The step-by-step guide was easy to follow, even for a beginner like me.

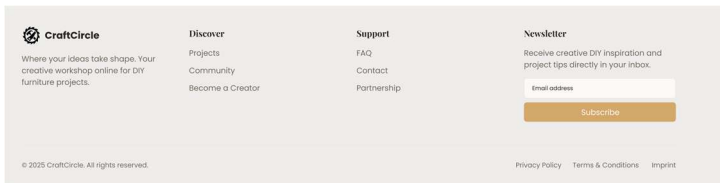

♡ 12

After finishing her table, Lena writes a comment:

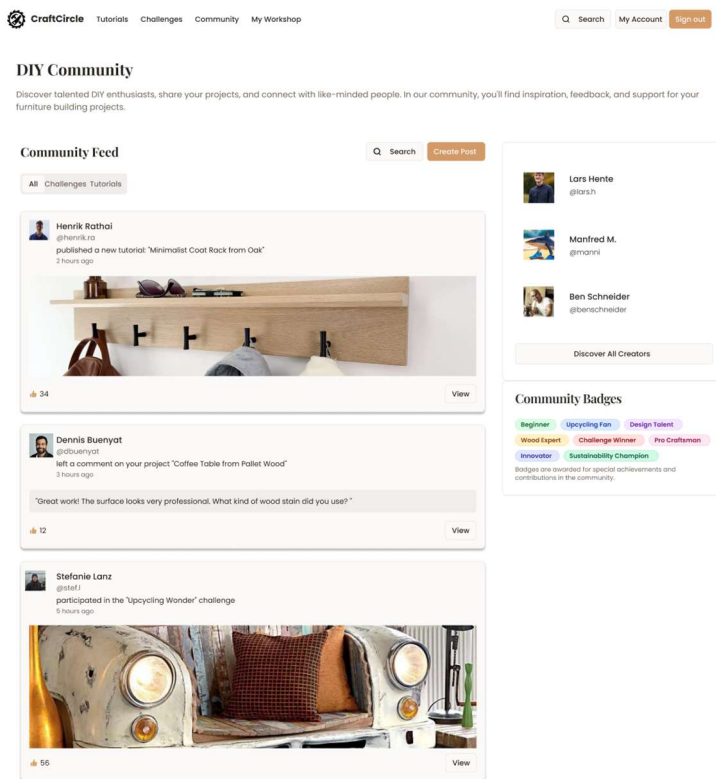

"Thank you for the great tutorial! I just finished my coffee table and I'm so happy with how it turned out. The step-by-step guide was easy to follow, even for a beginner like me."

After completing her project, she is so enthusiastic about the tutorial that she decides to explore the top-rated tutorials herself on the landing page. She goes to the most popular projects view and sees the rating and difficulty level displayed.

In the footer, she sees the option to subscribe to a newsletter that will keep her up to date with the latest exciting content. All she needs to do is enter her email address.

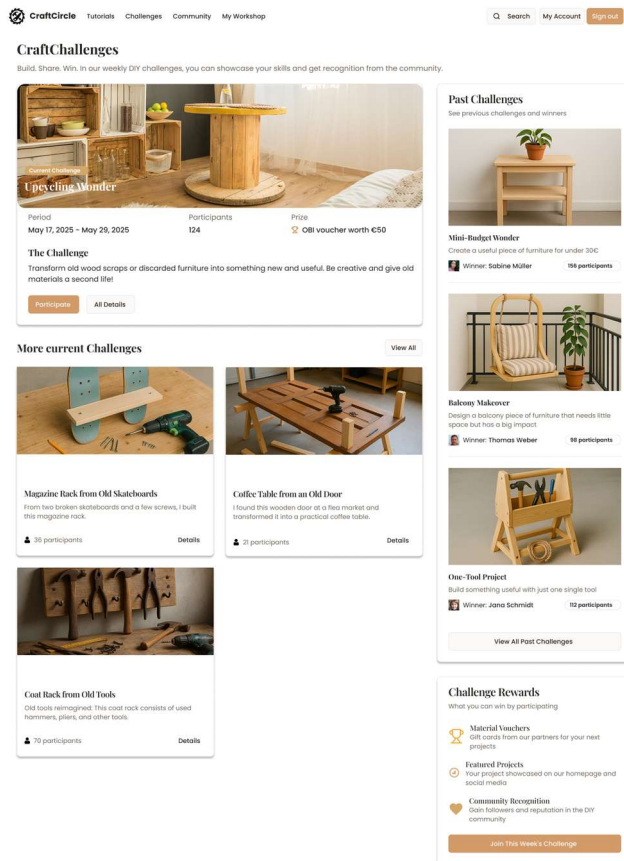

After some weeks of using CraftCircle Lena starts a new session on the DIY community page, where she keeps up with posts from friends, fans, and creators. She notices that Henrik Rathai has just published a new tutorial, “Minimalist Coat Rack from Oak,” which is already getting attention from the community. Scrolling down, she sees that Dennis Bünyat left a comment on his own “Coffee Table from Pallet Wood” project, complimenting the finish and asking about the wood stain used.

Finally, what really catches her eye is Stefanie Lanz’s post - she just participated in the “Upcycling Wonder” challenge.

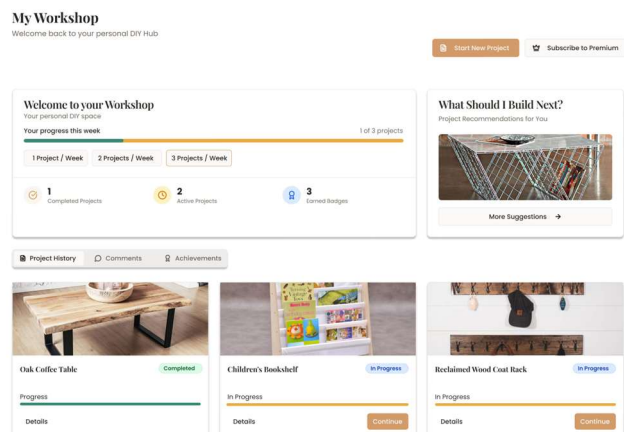

Intrigued, Lena goes to the challenge Page through the navigation bar to get an overview of the currently running

challenges.

At the challenges tab she sees the challenge Stefanie participated in. The challenge is still running until the 29 of May, 2025 and offers a price - a 50€ voucher from partner OBI.

Lena makes a mental note to come back later and think about a suitable project to submit.

After some time, Lena is thinking about buying a subscription. To consider if it's worth it, she reviews her last projects.

At the top, she can track her weekly project progress, how many projects she's completed, which ones are active, and how many badges she's earned.

Below, she finds a grid with all her projects, showing their status.

After one month, she reviews her account to check her subscriptions and transactions. Thanks to her monthly subscription, she can save time and money by gaining access to all tutorials. This allows her to browse and evaluate them more effectively, helping her decide which ones suit her best.

she is no longer interested in from her list. She now wants to remove the “Rustic Coffee Table” project, as it was her first tutorial and she has completed it.

In her account, she checks the "My Projects" section to see which tutorials are still ongoing. She is now considering becoming a creator herself, as she has gained significant experience in building DIY furniture projects. She can edit the status of her projects or delete the ones

Content Creator

Ben Schneider is a carpenter and DIY-Youtuber. He became a creator with CraftCircle to reach a broader audience and generate more income from his tutorials.

Ben is engaged in the community, offering tutorials and advice to others.

As a sign of appreciation for his great

tutorials, Ben receives positive feedback in the form of many 5-star ratings.

Ben has just finished building a coffee table made from pallet wood. Excited to share his work and inspire others, he heads to the “Upload Tutorial” page on CraftCircle. At first, he starts filling out all the basic information: The title, category, difficulty level and expected duration along with a description of the project.

At this point he can choose to publish the tutorial with or without the standard price of 2€, which would make it available to premium users or paying customers only. To reach a wider audience he chooses to create a free tutorial for the coffee table.

As soon as he successfully completed the upload, he realizes that he underestimated the duration of the project. Therefore, he updates the tutorial.

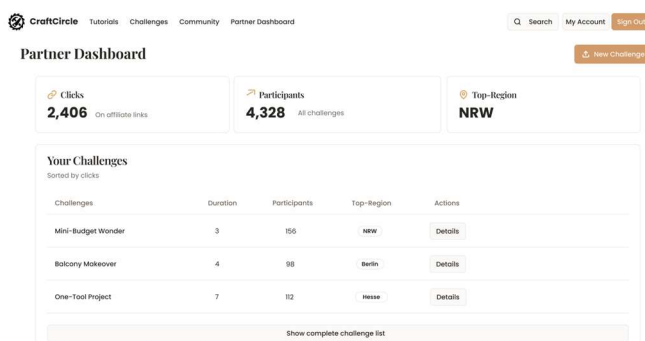

After publishing his new tutorial, Ben heads to his creator dashboard. He loves seeing all his tutorials and their statistics in one place. Ben notices that his “Modular Solid Wood Shelving System” is his most popular tutorial, but his latest coffee table project is already gaining traction. He feels proud to see his audience growing, and even more motivated to keep sharing creative ideas.

Material and Tool Supplier (Partner)

Jana Becker is a regional marketing manager at OBI in Nuremberg and is always looking for new ways to connect OBI with DIY-Enthusiasts. She's driven by data and focussed on digital campaigns that promote OBI's tool rental service to a younger, online audience. Jana's goals are to boost measurable engagement, drive tool rentals, and position OBI as a modern DIY enabler.

Jana checks her dashboard to monitor the current performance of the partnership with CraftCircle.

Description
Transform old wood scraps or discarded furniture into something new and useful. Be creative and give old materials a second life!

Cancel Save as Draft Publish

As part of the partnership, Jana decides to launch a new promotion: a co-branded challenge in collaboration with CraftCircle, encouraging users to build their first DIY project using OBI rental tools.

She publishes the new challenge via her partner dashboard using the “New Challenge” feature. The process works the same way as it does for Ben when publishing tutorials.

This data must be entered for a challenge: title, description, start date, submission date, award, difficulty, duration, category and recommendation. In the description, she always writes where the DIY-Enthusiasts should upload their projects. In award, she determines which awards OBI would like to give to the winner. CraftCircle offers a lot of creative freedom for her.

UML Class Diagram

This UML class diagram represents CraftCircle, a platform for DIY projects. The central class of this platform is User, which is subdivided into the roles DIY-Enthusiast, Content Creator and Partner. These roles also correspond to the customer segments. Each user has payment information. Payments are processed via Stripe.

Another important class is Project, which represents the published projects. DIY-Enthusiasts are the most important users of the platform. They can take out a subscription to avoid having to pay for individual projects. Projects are created exclusively by Content Creators and made available to DIY-Enthusiasts either for free or for 2€ except for premium users, who are granted access through their subscription. Each subscription payment and project purchase are saved as a transaction for DIY-Enthusiasts.

A project consists of instructional steps with pictures and may also include a tutorial video. Content Creators also specify the required materials and tools including estimated costs in text form. DIY-Enthusiasts can save projects and track their progress. They can also rate the projects with up to five stars.

Another central component are the challenges that can be published by Partners. Any DIY-Enthusiast can take part. The Partner determines where the submissions are made, who the winner is, and which prizes are awarded. By participating in challenges, DIY-Enthusiasts can also win badges.

Another feature of CraftCircle is the community posts. These can be written by any user and liked by others. Comments can be made under each challenge and each project.
